

Hi there!

Start charging your EV

Quick Start Guide to
installing a charging station

This charging station includes
E-Flux Software, which
enables the following **features**:

Hardware agnostic: execute **remote maintenance** to all charging stations you installed.

Setup and configure the charging station in your E-Flux Technical Dashboard.

Your customer has 24/7 access to the **E-Flux hotline**.

Your customer can set **tariffs**: all sessions will be **billed** and **reimbursed automatically**.

Follow these steps

1. Is the charging station **already pre-configured** to E-Flux? **Proceed to step 2.**

- **Is the charging station not pre-configured to E-Flux?** Scan QR code 1 or go to: manuals.e-flux.io/configuration/. Please select the right manual, and follow instructions provided.

2. **Login to your E-Flux account.**

Not an E-Flux partner yet? Scan QR code 2 or go to www.e-flux.io/installer-signup. After creating an account, proceed to step 3.

3. **Go to “Setup New EVSE” in the menu on the left and enter the serial number or OCPP ID.**

1. Click on “Setup charging station”.
2. Click on Upload Configuration, then click Next.
3. Choose and define the connector type, and choose “Save Connector Configuration”.

Your customer can now register the charging station!

Please hand the
“Ready to Charge” envelope
to your customer!
